CONSUMER GUIDELINES

Consumer satisfaction is our basic motto, our objective and our belief with Parkovic products.

Our trained executives maintain direct link with ultimate consumers, educating them about product quality, convenience of operation and usage and also preventive maintenance measures required at the consumers end.

The following guidelines, when followed by plumbers & consumers, ensure optimum and trouble-free performance of our products for years to come.

- Supply pipelines should be laid straight and vertical keeping the number of joints to a minimum-keeping the number of bends/elbows etc also a minimum possible to avoid restriction to flow of water.
- Supply lines must have vent pipes for removing air-locking in the water supply lines so as to get smooth flow water through the fittings.
- Flush all pipe lines before starting installation of metal fitting so that dirt and other foreign particles should not spoil the metal fittings.
- All tiling work should be fully completed before installing metal fitting.
- To protect the finished taps and fitting from dirt, stains and other damages, cover them with polypack/cloth after their installation till they are put to actual use.
- Clean the aerator at regular intervals of time for free flow of water from the fitting. Weekly cleaning may be better.
- Please buy Parkovic products from authorized dealers only to ensure genuine quality material.
- To retain the original shine & sparkle, Parkovic fittings needs a certain amount of care.
- Don't use aggressive cleaning agents, since these may spoil the finish of your Parkovic fittings.
- Don't use salt or vinegar based cleaning agents to remove scale or scale related agents.
- Clean the Parkovic fitting with mild soap lather for chrome plated surfaces.
